FARIS RAJA ARDANA, S.KOM.

WEB & SOFTWARE DEVELOPER

Bogor / Jakarta, Indonesia • farisraja003@gmail.com • +62 889-8870-0804
Portfolio: farisrajaardana.vercel.app • GitHub: github.com/farisraja • LinkedIn: linkedin.com/in/faris-raja-ardana

PROFESSIONAL SUMMARY

Computer Science graduate (Bachelor of Computer Science / S.Kom., GPA 3.47 / 4.00) from Universitas Pakuan specializing in modern web engineering and high-performance full-stack software development. Proven hands-on capability in architecting modular user interfaces, RESTful API integrations, AI/LLM model integrations, and relational database schemas with Next.js, React, Laravel, Python, and PostgreSQL. Currently contributing as a Web Developer at PUSDIK Mahkamah Konstitusi RI, driving the MKLC digital learning platform through SCORM runtime simulators, system integrations, and rigorous end-to-end reliability testing.

EDUCATION

Universitas Pakuan — Bogor, Indonesia

Bachelor of Computer Science (S.Kom.), Computer Science Major — Graduated

Faculty of Mathematics and Natural Sciences (FMIPA) — **IPK / GPA: 3.47 / 4.00** (Highly Satisfactory (Sangat Memuaskan))

Relevant Coursework: Software Engineering, Data Structures & Algorithms, Relational Database Systems, Computer Networks, Web Application Development, Artificial Intelligence & Data Mining

PROFESSIONAL EXPERIENCE

PUSDIK MK (Center for Pancasila and Constitutional Education, Constitutional Court of RI) — Bogor / Jakarta, Indonesia

Web Developer — September 2026 – Present

- Engineered and maintained core functional modules for the MKLC (Constitutional Court Learning Center) digital learning ecosystem leveraging Next.js 14 App Router and Laravel.
- Implemented standalone runtime simulators for SCORM 1.2 (window.API) and SCORM 2004 (window.API_1484_11) specifications featuring multi-window bridges and persistent auto-resume state via CMI data models (cmi.location & cmi.suspend_data).
- Architected a custom Same-Origin Reverse Proxy via Next.js Rewrites to eliminate cross-origin (CORS) restrictions when serving 300+ MB interactive judicial training modules.
- Conducted comprehensive functional end-to-end testing of learning modules and authored system documentation to ensure operational resilience and zero-downtime reliability.

FMIPA Universitas Pakuan — Bogor, Indonesia

System Administration & Data Officer — 2023 – 2024

- Administered faculty digital academic records and maintained student and lecturer database registries with strict verification protocols.
- Facilitated operational workflows and digital archiving for the web-based library information system (Digital Library FMIPA) managing theses and academic publications.
- Supported faculty IT infrastructure operations and contributed technical assistance for periodic administrative reporting.

Independent Field Research (Freelance) — Jakarta, Indonesia

Field Data Surveyor — April 2026 – August 2026

- Executed structured primary field data collection, verification, and ground-truth validation across designated Jakarta metropolitan districts.
- Maintained rigorous data integrity, standardized survey protocols, and quantitative sampling accuracy for analytical research pipelines.

SELECTED SOFTWARE ENGINEERING PROJECTS

PB Cipta Badminton League Application [Source] [Live Demo] 2024

Full Stack Developer | `React 18, TypeScript, Tailwind CSS, Vite, Supabase, Express.js`

A modern web platform for badminton tournament management, featuring real-time live score updates, automated match statistics, and dynamic tournament leaderboards.

- Engineered a responsive, mobile-first user interface with React and Tailwind CSS providing tournament brackets and intuitive match scorekeeping.
- Integrated Supabase (PostgreSQL) backend for real-time live score syncing, automated match logging, and instant tournament standings computation.

AI Resume Optimizer (ATS Beater) [Source] 2024

Full Stack & AI Integration Developer | `Python 3.12, FastAPI, Google Gemini 1.5 Flash Vision & Pro, LaTeX, Vue 3, PostgreSQL`

An open-source AI platform that optimizes professional resumes against target job descriptions via contextual semantic matching and automated ATS-standard rendering.

- Integrated Google Gemini 1.5 LLMs through a FastAPI backend for real-time semantic gap analysis, keyword density scoring, and tailored resume optimization.
- Developed an automated headless compilation pipeline using LaTeX (pdflatex) that outputs structured, high-conversion ATS-friendly PDF documents.

MKLC SCORM Platform & Simulation Engine [Source] 2026

Full Stack SCORM Specialist & System Architect | `Next.js 14, Laravel 10, PHP 8.1, PostgreSQL 16, SCORM 1.2/2004 RTE, Docker`

Enterprise e-learning platform and SCORM runtime engine standardizing interactive judicial education for the Constitutional Court of Indonesia's Training Center.

- Developed an interactive LMS player environment using Next.js 14 App Router supporting SCORM 1.2 and 2004 RTE specifications and test suites.
- Engineered high-performance REST APIs with Laravel 10 & PostgreSQL featuring chunked resumable file uploaders for unpacking and parsing courseware XML manifests.

Retail Market Basket Analysis Platform [Source] 2024

Web Developer & Data Mining | `Laravel, PHP, MySQL, Tailwind CSS, Vite, Blade`

Data mining web platform analyzing retail transaction histories with association rule mining algorithms to identify consumer purchasing behavior and product affinities.

- Engineered transaction processing pipeline calculating support, confidence, and lift ratio metrics to extract actionable item association rules.
- Delivered interactive analytical dashboard visualizing cross-merchandising suggestions and optimized store product placement layouts.

TECHNICAL SKILLS

Programming Languages:	JavaScript (ES6+), TypeScript, PHP, Python, SQL, HTML5, CSS3
Frontend Development:	Next.js (App Router), React, Vue 3, Tailwind CSS, Bootstrap 5, Vite, Framer Motion
Backend Development & APIs:	Laravel (Eloquent, Blade), Node.js, Express.js, FastAPI (Python), CodeIgniter 3, RESTful APIs, Laravel Sanctum, WebSockets
Databases & Storage:	PostgreSQL (Neon Cloud / Local), MySQL, Room Database (Mobile SQLite), Google Cloud Storage (GCS)
Architectures & Specializations:	SCORM 1.2 & 2004 E-Learning Standards (RTE / CMI), LaTeX Typesetting (pdflatex, resume.cls), AI/LLM Model Integrations (Google Gemini Flash & Pro API), UI/UX Engineering & Responsive Architecture
Developer Tools & DevOps:	Git, GitHub, Docker, Docker Compose, Vercel, UV (Python), Alembic, Postman, VS Code, Figma
Networking & Infrastructure:	Cisco Networking (IPv6 Routing & Switching Transition), Linux/Bash Environment, Apache Web Server
